

INTRODUCTORY NOTES

This photograph collection is on long term loan to SVBM.

Before the collection came to SVBM, someone had sorted these photos into bundles and envelopes. At the same time many photos were rubber stamped on the back. This probably should not have happened. Regrettably the ink from the rubber stamps has made marks on a few of the photos.

Also the reference to copyright is, in a large number of cases, NOT CORRECT - especially the copy photos, many of which are known to have been provided by other sources.

After the collection came to SVBM, it was decided to keep the vast majority of photos in the same bundles and envelopes, although some might logically be elsewhere.

Within each bundle or envelope the photos have been put into some order. If a bundle contains a large number of photos from one operator, these may have been separated into, for example, double deck / single deck / service vehicles. Some envelopes contain photos of various sizes and the order may reflect this.

The information in the catalogue is accurate as far as possible, but cannot be guaranteed. No liability can be accepted for any errors.

All are black & white except those marked "colour" or "col"

Codes –

fn - front nearside

fo - front offside

rn - rear near side

ro - rear offside

f - front

r - rear

pc - postcard

Brackets - eg f(n) indicates front and only part of nearside showing.
